

1. Getting started

Create a free account, see what Free and Pro include, install the app and turn on phone alerts. About 3 minutes.

1 Create your free account

Open gettraderadar.com/register and sign up with Google or your email. No card needed. Free includes today's #1 market on Market Lens in full, 1 free market unlock a day, the morning "top 5 to watch" email, News Radar, 1 Prop Copilot account, the journal and the Trade Panel on your free markets.

A screenshot of the TradeRadar mobile app registration screen. The background is dark. At the top is the TradeRadar logo. Below it, the text 'Create your free account' is displayed in large white font. A smaller line of text describes the free tier benefits. There are two main registration options: 'Continue with Google' (a white button with the Google logo) and 'or register with email' (a link). Below the email link are three input fields: 'Full Name' with a person icon and the text 'John Doe', 'Email' with an envelope icon and the text 'you@example.com', and 'Password' with a lock icon and the text '8+ characters, A-z and a number'. A red eye icon is next to the password field. At the bottom is a large red button labeled 'Create free account'.

Sign-up on a phone: Google or email, no card.

2 Free vs Pro

Pro opens all 27 markets with the AI read, Lens Alerts (email, phone and MT5 push), APEX (web, MT5, MT4; TradingView on request) with a structure checklist on every setup, the Trade Planner, Send to MT5 on demo accounts and 10 Prop Copilot accounts. Pro is R49 for your first week, then R449/month on the same payment method unless you cancel before day 8 (we email a reminder 2 days before). Cancel in 2 clicks: Settings → Subscription.

Plans in rand on /pricing. Scout (R179) and Elite (R899) are listed there too.

3 Install the app

TradeRadar is a web app you can install. Android: open gettraderadar.com in Chrome → menu (:) → Install app (or Add to Home screen). iPhone / iPad: open it in Safari → Share → Add to Home Screen, then always open TradeRadar from the Home Screen icon. Desktop Chrome / Edge: the install icon in the address bar.

4 Turn on phone alerts

Settings → Connections → Alerts → "Turn on phone notifications", tap Allow, then "Send test notification". On iPhone this only works from the installed Home Screen app (iOS 16.4 or newer); see Troubleshooting if a test does not arrive.

On iPhone the card shows the Home Screen steps first.

Still stuck? Open gettraderadar.com/guide#getting-started and tap **Ask in chat**, or reply to any TradeRadar email.

Analysis, not advice. You place every trade. Trading leveraged products carries a high risk of losing money. TradeRadar is not a financial services provider and gives no trade recommendations. Online version with videos and search:
