6. Send to MT5 (demo accounts)

Pro (incl. the R49 week): send an order you planned in the Trade Planner to your own DEMO MetaTrader terminal. Real-money and contest accounts are always refused for customers. A tool you operate: no advice, no auto-trading, no copy trading.

1. **Use the Exec Connector on your demo terminal**

   From the kit, put TradeRadarConnectorExec in MQL5\Experts and attach it to one chart of your DEMO account (instead of the plain Connector), with the same ConnectionKey.

2. **Allow execution (off by default)**

   F7 → Inputs → AllowTradeExecution = true. Set MaxLotsPerOrder (default 0.10) and MaxOrdersPerDay (default 5), keep ConfirmEachOrder = true, and turn Algo Trading on.

3. **Check "Demo ready"**

   Settings → Connections → Trade execution shows "Demo ready" when the demo terminal is online. You can switch the feature off there at any time.

4. **Send from the Trade Planner**

   Market Lens → Trade Planner: pick direction, entry, a stop-loss (required) and an optional take-profit → Send to MT5 (demo) → check → Confirm, then click Yes in MetaTrader. Orders expire after 60 seconds and execute once.

Still stuck? Open gettraderadar.com/guide#send-to-mt5 and tap **Ask in chat**, or reply to any TradeRadar email.

Analysis, not advice. You place every trade. Trading leveraged products carries a high risk of losing money. TradeRadar is not a financial services provider and gives no trade recommendations. Online version with videos and search: https://gettraderadar.com/guide
