

7. Trade Planner

A risk calculator on the Market Lens chart (free on today's #1 market, every market on Pro). You pick the direction and your own entry; it never picks a trade.

1 Open the planner

On Market Lens, open "Trade planner" under the chart. Choose Long or Short and your entry (type a price or click the chart).

The Trade Planner on Market Lens.

2 Read the numbers

It places the structure stop beyond the flip level, measures the next liquidity levels in R, and works out an approximate lot size from your balance, account currency and risk %, with a warning if it would break a prop rule. Check your broker's contract size for indices and metals.
